Skills

• **Snowflake** | **SQL** (Mysql, Postgres) | **AirFlow** | **Google Cloud Platform** (Vertex AI, Big query, Cloud function, Cloud run, Data proc, Cloud storage, Pubsub) | **AWS** (Glue, s3, Lambda, Athena, Redshift, SQS, SNS, Event Bridge, Step function, CDK, Dynamo, EMR, MSK) | **Terraform** | **Power BI** | **AWS CDK** | **snowflake** | **Databricks** | **Spark** | **SQL** | **FastApi** | **Dbt** | **Machine Learning** | **Gitlab CI/CD** | **Web Scrapping**

Certifications

- SnowPro Core Certification - **October 2023 to October 2025**
- Snowflake Sales Professional Accreditation - **January 2024 to January 2026**
- Snowflake Technical Sales Professional Accreditation - **January 2024 to January 2026**
- Dbt Fundamentals - **April 2024 to April 2026**

Experience

Senior Data Engineer

Worldpay

Medellin, Colombia 12/2024 - Current

- **High-Performance ETL Optimization:** Spearhead the optimization of complex ETL pipelines using **AWS Glue and Apache Spark**. Focused on refactoring code and tuning configurations to drastically reduce processing time and compute costs while handling massive datasets.
- **Technical Leadership & Team Strategy:** Act as the **Technical Lead and trusted delegate** for the Engineering Director. Responsibilities include leading daily stand-ups, conducting in-depth code reviews, and resolving architectural blockers to ensure sprint goals are met.
- **Architectural Oversight:** Drive high-level decision-making for the data ecosystem, integrating **DBT, AWS glue, Databricks and Snowflake** best practices to ensure scalability. Design robust solutions that support advanced data mining and pattern discovery initiatives.
- **Reliability & Observability:** Engineered a proactive observability framework using Datadog, implementing real-time monitoring that guarantees data availability and quality for critical business reports.
- **Data Quality Automation:** Established automated testing frameworks that validate data integrity at every stage of the pipeline, ensuring reliable inputs for downstream analytics and ML models.

Senior Data Engineer

BlankFactor

Medellin, Colombia 10/2023 - 12/2024

- **Foundation & Migration:** Designed and deployed the foundational Data Warehouse architecture on **AWS GLue and Snowflake**. Led the migration strategy using Python, Pyspark, bash and SQL, ensuring zero data loss and seamless transition from legacy systems.
- **Snowflake Subject Matter Expert:** Leveraged **SnowPro Core certification** to advise the client on Snowflake optimization, significantly improving query performance and introducing cost-saving clustering strategies.
- **DevOps Transformation:** Introduced modern DevOps practices to the client's environment, implementing **Infrastructure as Code (IaC)** with Terraform/CDK and setting up CI/CD pipelines to automate deployments.
- **Strategic Consulting:** Provided high-level technical advisory to stakeholders, demonstrating the value of modern data engineering practices which facilitated the client's decision to internalize the role.
- **High-Performance ETL Optimization:** Spearhead the optimization of complex ETL pipelines using **AWS Glue and Apache Spark**. Focused on refactoring code and tuning configurations to drastically reduce processing time and compute costs while handling massive datasets.

Data scientist

Outseer

11/2022 - 10/2023

- As a Data Science, I specialize in developing advanced data pipelines and machine learning algorithms to identify and mitigate fraud patterns, leading to a 40% increase in detection rates.
- By automating the generation of detailed reports on data quality and fraud patterns.
- My expertise extends to optimizing SQL queries through sophisticated sampling methods and the removal of redundant statements, enabling the customized design of Data Warehouses for each client under my purview.
- Additionally, I leverage my deep knowledge in data engineering to present comprehensive analyses and innovative solutions to combat fraud to a diverse client base in Latin America, Europe, and Asia, ensuring data integrity and enhancing security measures.

Senior Data scientist

Nutresa

Medellin, Colombia 01/2022 - 11/2022

- As a seasoned Senior Data Science with expertise in AWS and Google Cloud, I excel in designing and implementing machine learning models and data pipelines, utilizing Python, SQL, and Spark.
- My work focuses on structuring solutions from start to finish, including data unification, model creation, and deployment via REST APIs, leveraging CI/CD and Infrastructure as Code (IaC) for efficiency.
- Beyond technical execution, I lead in project documentation, code reviews, and model lifecycle management, driving improvements in e-commerce sales and inventory distribution.
- My leadership ensures team collaboration, innovation, and adherence to best practices in data engineering, delivering scalable and impactful data solutions.

Data scientist & Data Engineer

Protección S.A

Medellin, Colombia 01/2019 - 01/2022

- As a skilled Data Science/Engineer with proficiency in both AWS and Google Cloud, I focus on crafting and deploying sophisticated data pipelines and algorithms for data extraction, transformation, and loading into data lakes and warehouses.
- My expertise encompasses developing automated data ingestion systems with custom triggers and connectors for a variety of data sources, including APIs, databases, and flat files.
- In addition to automating complex processes such as insurance claims consolidation and estimation using machine learning and probability algorithms, I also engineer solutions for demand forecasting and advisor time optimization in physical offices.
- These solutions are seamlessly integrated into business operations through REST API deployments, utilizing advanced features of AWS and Google Cloud for scalable and efficient data management.

Experience

- My technical leadership ensures the strategic alignment of data infrastructure with business objectives, optimizing operational efficiency and reducing customer wait times.

Data Engineering Research Student

Universidad Nacional de Colombia

Medellin, Colombia 01/2018 - 03/2019

- I streamline data operations by automating cleaning and integration processes
- My expertise lies in extracting and reformatting data from diverse sources and formats, consolidating it into structures primed for algorithmic action.
- I've developed algorithms specifically designed to detect inventory mismatches, leveraging cloud technologies for scalable, efficient data manipulation.
- This approach not only enhances data accuracy but also supports strategic business decisions through improved data quality and availability.

Education

Bachelor of Science

Universidad Nacional de Colombia

Medellin, Colombia 08/2014 - 03/2019

- **Statistics** - Advanced statistics / Statistical learning / Sampling / Design of experiments / Data quality

Master in engineering

Universidad Nacional de Colombia

Medellin, Colombia 08/2020 - 08/2022

- **System Engineering** - Research focused on the creation of algorithms for cleaning and evaluation of data quality.

Master in Humanities

Tech university

Medellin, Colombia 08/2023 - 12/2024

- **World history** - Study of the history of humanity from Neolithic to contemporary history
